

How to Submit a Trade Journal

About 15 minutes, start to finish. The website fills in the numbers for you. You bring the thinking.

The website: lakewood-investment-club.netlify.app

It works on a computer, iPad or phone. Tip: bookmark it, or on an iPad or iPhone tap **Share** → **Add to Home Screen** so it sits with your other apps.

You don't need a password to submit. The password is only for the committee's Review Desk.

1 Open the website

You'll land on the **Submit a Trade** page. Everything happens on this one page, top to bottom.

The screenshot shows the 'Submit a Trade' page. At the top, there's a navigation bar with 'INVESTMENT CLUB | Trade Journal' on the left, 'Submit' and 'Review Desk' in the center, and a 'Dark' toggle button on the right. Below the navigation bar, the page title 'MEMBER SUBMISSION' is followed by 'Submit a Trade'. A paragraph explains that completing the homework helps the committee make a fast, well-informed decision. A link 'Read the quick plain-English guide' is provided for new users. The main form area is titled 'TRADE IDENTIFICATION' and contains a 'SYMBOL' field with a 'START HERE' button. Below the field, a note says 'Enter the ticker and hit Auto-fill — the numbers below fill themselves in.' The 'AAPL' ticker is entered in the field, and an 'Auto-fill' button is next to it.

Prefer a darker screen? Tap **Dark** in the top right corner. Tap it again to switch back.

2 Type the stock symbol, then tap Auto-fill

In the box marked **START HERE**, type the stock's ticker symbol (for example **MU** for Micron, **AAPL** for Apple) and tap **Auto-fill**.

In a few seconds, the company name, exchange and all the numbers fill in by themselves, and a green line says how many fields it filled. Then type your name in **Suggesting / Monitoring Member**.

TRADE IDENTIFICATION

SYMBOL **START HERE**

Enter the ticker and hit Auto-fill — the numbers below fill themselves in.

✓ Filled 13 fields. Review them, then write your thesis below.

STOCK / COMPANY NAME

DATE

EXCHANGE

SUGGESTING / MONITORING MEMBER

Don't know the symbol? Search the company name plus "stock symbol" on Google.

3 Check the numbers and add your two prices

Today's price and the year's high and low are already filled in. Add the two prices only you can decide:

- **Entry Target:** the price you'd ideally like the club to buy at.
- **Exit:** the price you'd plan to sell at.

PRICE LEVELS

SHARE VALUE TODAY (\$)

ENTRY TARGET (\$)
The price you'd ideally like to buy at.

EXIT (\$)
The price you'd plan to sell at.

PREVIOUS 1-YEAR HIGH (\$)
Highest price over the past year. (Auto-fills.)

PREVIOUS 1-YEAR LOW (\$)
Lowest price over the past year. (Auto-fills.)

4 Glance over the fundamentals

These are filled in too. Under each label there's a short plain-English explanation of what it means. Pick **Growth or Income**: growth if you're hoping the price rises, income if you're mainly after the dividend.

COMPANY FUNDAMENTALS

Auto-filled from FintHub market data - as of 2026-10-01 - worth a quick sanity-check before you submit

SECTOR CATEGORY Technology	MARKET CAPITALIZATION The company's total size — Large, Mid, or Small. Large	GROWTH OR INCOME? Growth = you're betting the price rises. Income = you're mainly after the dividend. Select...
BETA (MKT VOLATILITY) How jumpy the stock is vs. the market. 1.0 moves with it; above 1 swings more. 2.36	P/E RATIO Price-to-Earnings — how pricey the stock is vs. its profits. Higher = higher expectations built in. 24.0	PRICE / REVENUE PER SHARE Price vs. the company's sales — another gauge of how expensive it is. 13.4
EARNINGS PER SHARE (\$) Company profit divided by number of shares. 44.17	DIVIDEND PER SHARE (\$) Cash paid to shareholders per share each year (0 if none). 0.50	DIVIDEND FREQUENCY Quarterly

The grey line at the top says where the numbers came from and on what date. They're accurate as of that day. A quick sanity-check never hurts.

5 Not sure what to write? Tap "Help me get started"

Next to **Investment Thesis**, the  **Help me get started** button gives you six questions about that particular company. Answer them in your own words and you'll have most of your write-up.

INVESTMENT THESIS

Help me get started

Questions to get you started on MU

Answer these in your own words and you'll have most of a thesis. These are prompts, not answers — the thinking is yours.

1. What does Micron actually make, and which customers buy most of it?
2. Who are Micron's main competitors, and how does it compare with them?
3. What has changed in the past year that explains the big jump in sales?
4. Memory prices have a history of booming and then crashing. What would a downturn look like this time?
5. What would have to happen for this to turn out to be a bad investment?
6. What price, or what news, would make you decide to sell?

Hide these

These are questions, not answers. The AI never tells you what to think or whether to buy. You're welcome to take the questions to ChatGPT or another tool to research the answers, but the opinion you write down should be yours.

6 Write your thinking, in plain words

This is the part the club cares about most. A sentence or two in each box is plenty. Write it the way you'd explain it to a friend over coffee.

- **How did this land on your radar?** (optional) A podcast, a product you use, something in the news.
- **Core Thesis:** what the company does, and why you think it will do well.
- **Competitive Moat:** what keeps competitors from catching up.
- **Why Now:** why now rather than later.

HOW DID THIS ONE LAND ON YOUR RADAR? optional

Not the market case — just how you came across it. A podcast, a product you use, something a friend keeps mentioning, a story in the news. Often the most interesting line in a submission.

I follow semiconductors closely, and Micron keeps coming up as the memory side of the AI buildout.

CORE THESIS

In plain words: what does the company do, and why will it do well? One or two sentences.

Micron makes the memory chips every AI server needs. AI demand has created a shortage, so it is selling everything it makes at record prices.

7 List the pros and the cons

A few short lines each. Naming the risks makes a submission *stronger*, not weaker. It shows you thought it through.

PROS & CONS FOR THIS TRADE

PROS FOR THIS TRADE

The bull case — the main reasons this could work out.

- Record revenue and margins
- AI memory is sold out

CONS FOR THIS TRADE

The bear case — what could go wrong or what you're worried about.

- Memory is famously boom-and-bust
- New factories arrive in 2027-28

8 Write your game plan

In **Trade Management**, say what you'd do if it goes up, goes sideways, or goes down, and what would make you change your mind. Rough is fine.

TRADE MANAGEMENT

THINK THROUGH EVERY POSSIBLE OUTCOME

Your game plan: when would you buy more, hold, or sell? What would make you change your mind?

Hold between \$950 and \$1,250. Sell if memory prices start falling or guidance is cut.

Describe how you will manage the trade for each outcome — no scenario should be "hope it goes up."

9 Tap "Submit Trade for Review"

The button is at the very bottom of the page. When it goes through, you'll see this green message:

 **Got it! Your MU trade is in.**

The committee will see it before the next meeting. Thanks for doing your homework — every submission makes the club smarter.

[Submit another](#) [Go to the Review Desk →](#)

That's it. Your Trade Journal is saved for the club and will be shared with members before the next meeting.

Common questions

Can I save it and finish later?

Yes. Your work is saved on that computer or iPad as you type (there's also a **Save draft** button next to Submit). Come back to the website on the same device and it's waiting for you. Nothing goes to the club until you press **Submit**.

Do I have to fill in every box?

No. The only must-haves are the stock symbol, your name and the Core Thesis. Fill in what you can; the club discussion will help with the rest.

Auto-fill says it can't find the symbol.

Check the spelling of the ticker. If it still doesn't work, you can type the numbers in by hand, or leave them blank.

I made a mistake after submitting.

No problem. Submit a corrected one and mention it to Bob, and the old one can be removed.

I don't understand a term.

Each box has a plain-English hint under its label, and the quick guide (linked at the top of the page) explains every field.

Something isn't working.

Try refreshing the page. If it still won't cooperate, let Bob or Brooks know.

A how-to for the club's Trade Journal website. General information only, not investment, tax or legal advice. Every member does their own research and the club decides together.
